

## 碳足跡

CCI Group is proud to announce that their manufacturing site in Kunshan, China (JCI) has received three certifications from China's Quality Certification Office (CQC), "Corporate Carbon Auditing", "Product Carbon Footprint", and "Carbon Neutral".

This is due to going through multiple carbon audits where the result from 2014's audit showed a 30% reduction in carbon emission compared to 2010's audit. Not only did JCI received three certifications but has also voluntarily put the time and energy to achieve this. The latest certification, "Carbon Neutral", was awarded by offsetting their carbon emission through purchasing renewable energy. This would make JCI the first company in China to accomplish such a feat of going "green" to such a degree.

([http://www.cnca.gov.cn/xwdt/hydt/201506/t20150625\\_25014.shtml](http://www.cnca.gov.cn/xwdt/hydt/201506/t20150625_25014.shtml)) Even after all of this JCI is not stopping here, their 4 year plan includes a further emission reduction of 30% in a move to show manufacturing doesn't have to be a "dirty" business.
